

## Z-Sections

### General Product Description

Cold-formed Z-section is highly accurate roll formed standard section.

It is manufactured by roll forming using SSAB's high-quality steels. It is mainly used in the construction, transportation and manufacturing industries where dimensional accuracy and high-quality steels are required. Standard steel grade is S235J2C+N, other steel grades upon request.

### Dimensions

h (mm)	b (mm)	a (mm)	t (mm)	r (mm)	M (kg/m)
53	40	30	3	3	2.66
100	50	50	3	3	4.48
150	50	50	4	4	7.44
