

U-Sections

General Product Description

Cold-formed U-section is highly accurate roll formed standard section.

It is manufactured by roll forming using SSAB's high-quality steels. It is mainly used in the construction, transportation and manufacturing industries where dimensional accuracy and high-quality steels are required. Standard steel grade is S235J2C+N, other steel grades upon request.

Dimensions

h (mm)	b (mm)	t (mm)	r (mm)	M (kg/m)
