

C-Sections

General Product Description

Cold-formed C-section is highly accurate roll formed standard section.

It is manufactured by roll forming using SSAB's high-quality steels. It is mainly used in the construction, transportation and manufacturing industries where dimensional accuracy and high-quality steels are required. Standard steel grade is S235J2C+N, other steel grades upon request.

Dimensions

h (mm)	b (mm)	a (mm)	c (mm)	t (mm)	r (mm)	M (kg/m)
28	15	8	12	2	2	0.95
30	30	10	10	2	2	1.52
34	19	8.5	17	2	2	1.19
50	30	14	22	3	3	2.78
50	40	10	30	3	3	3.07
100	50	15	70	3	3	4.95
